

Roaches Preparation Checklist

Please complete these steps before your scheduled service. Proper preparation is required for the treatment to be effective. For questions, call 309-263-0341

Kitchen & Food Areas

- ☐ Remove all items from kitchen and bathroom cabinets, pantries, and under sinks.
 - ☐ Place dishes, food, and small appliances in sealed bags or containers away from treatment areas.
 - ☐ Clean countertops, stovetops, and sinks thoroughly (remove grease, food crumbs, and spills).
 - ☐ Do not leave dirty dishes in the sink or on counters.
-

Home & Furniture

- ☐ Reduce clutter throughout the home — roaches hide in stacks of newspapers, boxes, and bags.
 - ☐ Empty trash cans and remove garbage from the home.
 - ☐ Move furniture 12–18 inches away from walls for technician access.
-

Floors & Cleaning

- ☐ Vacuum and mop floors before service.
 - ☐ Sweep behind appliances (refrigerator, stove, dishwasher) if possible.
 - ☐ Dispose of vacuum bags/canister contents in sealed trash bags outdoors.
-

Pets & People

- ☐ Remove all pets (dogs, cats, birds, reptiles, etc.) during treatment.
 - ☐ Remove or securely cover aquariums and turn off air pumps.
 - ☐ Cover or store any exposed food, dishes, and utensils.
 - ☐ All people and pets must vacate the home for **1–4 hours (or as instructed)**.
-

After Treatment (Initial Reminders)

- ☐ Do not clean treated areas for **at least 2 weeks** unless instructed.
- ☐ Expect to see some roach activity for several days as they come into contact with the treatment.
- ☐ Keep food sealed, surfaces clean, and clutter reduced to prevent reinfestation.
- ☐ 2 week follow-up treatment may be scheduled **upon customer request**.
- ☐ 2 week follow-up treatment typically priced at **50%** of original treatment price.

Reminder: Roach treatments work best when the home is clean, clutter-free, and food/water sources are minimized.
